

Policy Aims and Objectives of the National Property Administration in 2021

Making use of national assets through multiple channels to create sustainable finance

- 1.Coordinating the demands of various operations to handle the survey and land division of national real estate.
- 2.Helping all levels of government agencies to conduct transfers of land of national assets, promoting official business and infrastructure.
- 3.Supervising government agencies to manage national public properties effectively and encourage them to activate and make good use of these properties to create economic benefits.
- 4.Flexibly applying the methods of rental (including tendering), superficies tender, modification and utilization of national property to promote land profit, increasing the Treasury's revenues and decreasing the cost of management and maintenance.
- 5.Proactively solving the problems of occupied land, retrieving the land through multiple methods, and enhancing the value in use.
- 6.Coordinating and working divisionally to clean the coast environment to maintain clean and tidy land.
