

Policy Aims and Objectives of the National Property Administration in 2024

Facilitating the management of national assets and improving the utilization efficiency of revitalization

- (1) Proactively taking over national real estate and promoting the utilization of non-public use properties.
- (2) Strengthening authorities' professional knowledge of national public use properties, encouraging their utilization by means of diverse revitalization, and enhancing the utilization efficiency of national properties to maintain a sufficient balance in the national treasury.
- (3) Assisting government agencies at all levels in the appropriation of national real estate and advancement of official or public construction to promote national development.
- (4) Releasing national land through means involving leasing, establishment of superficies, improvement, and utilization; achieving the diverse revitalization of national assets; and attracting investment from the private sector to increase the revenue of the national treasury.
- (5) Proactively handling occupied national non-public use real estate, implementing actual land management, and utilizing retrieved land by means of diverse revitalization.
- (6) Working in coordination, dividing jobs to maintain a sound seashore environment to preserve the cleanliness and tidiness of the coastlands.
- (7) Proactively handling the restoration, management, and maintenance of national non-public use cultural assets, working in cooperation with external parties with resources for the joint maintenance and revitalization of cultural assets.
- (8) Strengthening the patrol and management of high-risk areas for dengue fever and enhancing environmental cleaning of national non-public use land to lower the risk of dengue fever outbreaks.
- (9) Joining forces with the private sector for the construction of office buildings to promote investments from the private sector and enhancing the efficiency of the utilization of national lands.
