

Policy outline of the National Property Administration in 2017-2020

Improving national asset management to create asset activation benefits

- 1 Improving national property information for coordination and utilization.
- 2 Coordinating agencies at various levels to promote business requirements (including the planning and construction of social housing) and conducting the appropriation of national real estate. Speeding up the take-over of constructed national public facilities by local governments.
- 3 Assisting agencies to improve the management of national public property and promoting activation and utilization to increase the benefits of property utilization.
- 4 Handling and retrieving occupied land under national non-public-use land to solve the problem of land occupation actively, activating retrieved land, and increasing the benefits of property utilization.
- 5 Applying the means of leasing, establishment of superficies by tender, and improvement and utilization flexibly to activate the utilization of national lands.
